Professional Summary

Pre-final year B.Tech Information Technology student with experience in full-stack web development and AI/ML applications. Proficient in React.js, JavaScript, and REST API integration. Built 3+ production-ready projects and completed an AI/ML internship through Infosys Springboard. Strong interest in developing scalable, user-focused, and data-driven software solutions.

Turning Ideas into AI-Powered Applications

Education

R.M.K. Engineering College (RMKEC), Kavaraipettai <i>B.Tech – Information Technology</i>	2024 – 2028 <i>CGPA: 7.73</i>
Kongu Matriculation Higher Secondary School, Morappur <i>12th – Higher Secondary</i>	2023 – 2024 <i>CGPA: 89.67%</i>

Technical Skills

Frontend: React.js, TypeScript, Tailwind CSS, ShadCN UI, Recharts

Backend: Node.js, Express.js, MongoDB, FastAPI, JWT Auth, REST APIs

Languages: Java, Python, JavaScript, TypeScript

AI/ML: Python (XGBoost, PyTorch LSTM), SHAP

Experience / Internships

Infosys Springboard Internship 6.0 <i>AI/ML Intern</i>	Feb 2026– Apr 2026 <i>Remote</i>
- Built Transfer-IQ, an AI-powered data transfer assistant using FastAPI, XGBoost, and PyTorch LSTM - Designed responsive React.js dashboards with Recharts for real-time data visualization - Deployed the application on Netlify and integrated SHAP for model explainability	

Projects

Profile Management System <i>HTML, CSS, JavaScript</i>	Dec 2025 – Jan 2026
- Engineered a full-stack profile management application with complete CRUD functionality, built on React.js with component-based architecture for scalable state management - Designed a fully responsive UI system ensuring a consistent, seamless experience across mobile, tablet, and desktop viewports - Structured reusable React components to optimize rendering performance and maintainability across the application	
Transfer-IQ <i>React.js, Vite, FastAPI, XGBoost, PyTorch LSTM, SHAP, Recharts</i>	Feb 2026 – Apr 2026
- Developed an AI-powered data transfer assistant platform integrating XGBoost and PyTorch LSTM models via FastAPI, enabling intelligent automation and real-time predictions - Designed an intuitive React.js dashboard with Recharts visualizations, translating complex ML outputs into clear, user-friendly data views - Deployed the full-stack application on Netlify with seamless frontend-backend integration for public live demonstration	
HealthPulse-AI <i>React.js, TypeScript, Tailwind CSS, Node.js, MongoDB, Gemini AI</i>	Dec 2025 – May 2026
- Built a comprehensive health assistant web app integrating Gemini AI, OpenWeather API, and WAQI API to deliver personalized, real-time health insights and environmental recommendations - Architected the full UI system using Tailwind CSS and ShadCN UI, designing responsive layouts, data dashboards, and interactive components - Implemented secure JWT-based authentication and RESTful API integration with Node.js and Express.js	

Certifications

Infosys Internship 6.0

Generative AI Professional

AI Foundations Associate

AWS Solution Architect Certification

Java Developer Certification

Software Testing Certification

Achievements

Shortlisted for Round 2 in 50+ competitive technical assessments and hiring challenges

Achieved Top 10 and Top 20 rankings in various national-level hackathons and coding competitions

Consistently ranked within the Top 50 participants across multiple technical events and hackathons
